

Instructions for the application of large graphics and boat names

1. Clean surface thoroughly to ensure no grease or dust present.
2. Carefully tape the graphic to the exact position, using masking tape along the top only.
3. Check position, adjust if necessary until you are satisfied that you have the graphic in the precise position you require.
4. Using the top masking tape as a hinge, raise the graphic enough to cut between each letter, keeping the tape in position.
5. Now, on the first letter, raise the letter and very carefully remove the protective paper. Take particular care that no parts of the letter come away with the protective layer. Dots of the 'i' and thin letters can be vulnerable.
6. Using a squeegee, starting from the top, carefully press the graphic into place, keeping the bottom away from the surface as you slowly work downwards, ensuring air bubbles are removed.
7. Now remove the top protective layer carefully, from the bottom up, ensuring the graphic is not lifted from the surface as you do so.
8. Leave the tape 'hinge' in place, repeat this process for each letter.
9. Eliminate any air bubble with a pin and move the air out with your finger or squeegee.

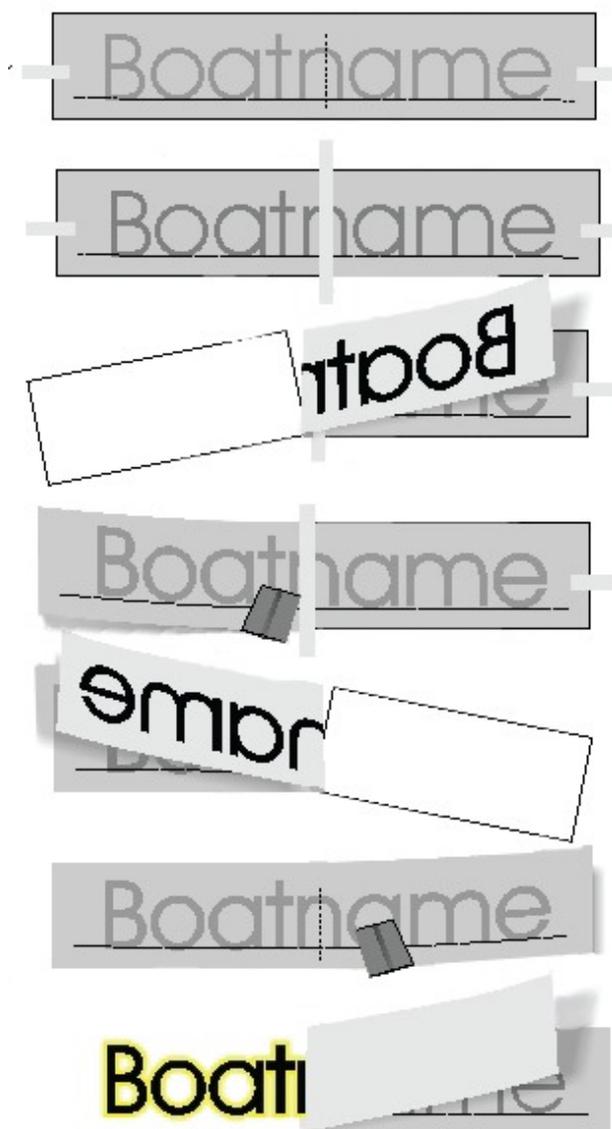

B O A T N A M E

For smaller graphics, it may be easier to apply as described overleaf

Instructions for the application of small graphics and boat names

1. Clean surface thoroughly to ensure no grease or dust present
2. Tape the graphic into position with masking tape as shown.
3. Measure and adjust location of the graphic.
4. When you have the graphic in the position you desire, tape down the centre of the graphic.
5. Lift one side of the graphic and separate the application tape from the backing paper. Using scissors, cut away that half of the backing paper.
6. Hold the application paper away from the surface, keeping it slightly slack and squeegee outward from the centre . Press firmly using overlapping strokes.
7. Discard centre strip of masking tape and lift remaining side of graphic. Remove the backing paper and squeegee outward from the centre.
8. Squeegee the entire graphic again pressing hard.
9. Remove the application tape by pulling it back over itself.
10. Eliminate any air bubble with a pin and move the air out with your finger or squeegee.

For larger graphics, it is better to apply one letter at a time. See instructions overleaf
